ZDMP: Zero Defects Manufacturing Platform

ZERO DEFECTS Manufacturing Platform

ZDMP

WP13: Impact

D13.2.1: Website -
Vs: 1.0.0

Deliverable Lead and Editor: Stuart Campbell, ICE

Contributing Partners: All

Date: 2019-05

Dissemination: Public

Status: EU Approved

Abstract

This document acts as a 'coversheet' for the work developed under T13.2.1 identified as D13.2.1 / Website. This material is of type 'DEC' whose nature is "Websites, patents filing…etc" and thus cannot be directly uploaded as a deliverable. For completeness, all 'paperwork' output of this activity is included in the WP13, T13.1, central reporting document "D13.1 Target/Driven Dissemination Strategy, Planning, and Reporting" and its iterations.

Document Status

Deliverable Lead	Stuart Campbell, ICE
Internal Reviewer 1	Jose Ferreira, UNIN
Internal Reviewer 2	N/A For this specific Document
Internal Reviewer 3	Usman Rashid, ICE
Type	Deliverable
Work Package	WP13: Impact
ID	D13.2.1: Website
Due Date	2019-03
Delivery Date	2019-05
Status	EU Approved

0 Introduction

0.1 ZDMP Project Overview

ZDMP – Zero Defects Manufacturing Platform – is a project funded by the H2020 Framework Programme of the European Commission under Grant Agreement 825631 and conducted from January 2019 until December 2022. It engages 30 partners (Users, Technology Providers, Consultants and Research Institutes) from 11 countries with a total budget of circa 16.2M€. Further information can be found at www.zdmp.eu.

0.2 Deliverable Purpose and Scope

This document acts as a 'coversheet' for the work developed under T13.2.1 identified as D13.2.1 / Website. This material is of type 'DEC' whose nature is "Websites, patents filing…etc" and thus cannot be directly uploaded as a deliverable. For completeness, all 'paperwork' output of this activity is included in the WP13, T13.1, central reporting document "D13.1 Target/Driven Dissemination Strategy, Planning, and Reporting" and its iterations.

Due to these reasons, this document/process does not follow the standard and comprehensive reporting layout but is simply a pointer to the main report of D13.1.

In this specific instance, the 'content' of the deliverable is directly available to all at www.zdmp.eu. This specific content will evolve over time and major changes reported in D13.1 even though D13.2.1 technically has only one report at M3. On the other hand, a final zipped copy of the web site will be annexed to the final D13.1 iteration at M48.

Specifically, the DOA states the following regarding this Deliverable:

O13	To disseminate and provide outreach of the project activity and results to encourage the spread of ZDMP results				
O13.2	To provide internal and external communication materials including a website				
T13.2	**Dissemination Materials, Internet, and Intranet**			**ICE/ITI**	**M1-3/M1-48**
D13.2.1	Website	DEC (Website)	PU	3	RDI1
In this task, the dissemination materials will be designed/produced – for external and internal use – including banners, brochures etc. Most importantly, the ZDMP website and portal will be implemented and maintained, based on the analysis of the project's needs. The project website will contain up to date information on the progress of the ZDMP project. Furthermore, it will be used to publish public deliverables and provide information on ZDMP events, publications, and exploitable results. The project's portal will consist of a private area to encourage the sharing of documents, knowledge, and the collaboration among the members of the ZDMP project. It will also contain a web-based document repository, in which work-in-progress publications and deliverables will be shared. Furthermore, it will provide access to an underlying source code version control repository used in the ZDMP development liked to WP1. The ZDMP Portal will also offer direct access to different social networks (eg Facebook, LinkedIn, etc) and Animated/Real-life YouTube videos related to ZDMP Project which will be created. The website (in basic form) will be up and running on day 1 of the project (through partner's own resources) and be developed more completely mostly within the first 2 months. The website will also consider the demands of the WP1 management work package, project management needs (eg					

> a web-based document repository in the restricted area, list server) and the Technical Management needs for eg bug tracking

0.3 Target Audience

The document aims primarily at the EU for traceability of the outcomes of type DEC.

0.4 Deliverable Context

This document is a cover page as earlier stated. However, the website itself will be a living and evolving mechanism used to create impact and interaction.

0.5 Document Structure

This deliverable is broken down into the following sections:

- **Section 0:** **Introduction**: ZDMP Document proforma
- **Section 1:** **Website**: Synopsis of the Website status

0.6 Document Status

This document is listed in the Description of Action as "Public" since it represents one of the projects key dissemination and interaction means.

0.7 Document Status

This document has no preceding documents or expected further formal iterations.

0.8 Glossary and Abbreviations

A definition of common terms related to ZDMP, as well as a list of abbreviations, is available at http://www.zdmp.eu/glossary

0.9 External Annexes and Supporting Documents

Annexes and Supporting Documents:

- D13.1 Target/Driven Dissemination Strategy, Planning, and Reporting

0.10 Reading Notes

- None

1   Website

The ZDMP website was up-and-running, in an extremely simplistic form, before the official start of the project although without cost to the project. Within the first week of the project, a more comprehensive site was developed with most current content being available at the end of M1. It has been added to over time as well as updates made including from multi-beneficiary input it will continue to evolve over time with more major updates especially for the subcalls and ongoing results. As prescribed, it will fulfil the function of providing:

- Project progress
- Publishing public deliverables
- Provide information on ZDMP events and publications
- Provide details of exploitable results
- Direct access to different social networks
- Host Animated/Real-life YouTube videos
- Information regarding the open calls / open call access point

Further changes will take place to align with continuing project imagery un D3.2.1 – Materials Production.

Within the DOA text, it also identifies a project portal. This is not part of the website and has been handled internally via OwnCloud and OneDrive as reported in D1.1 – Project Handbook. This already handles the needs of the WP1 Management workpackage including a based document repository.

Also, a source code version control repository used in the ZDMP development will be linked to the website and/or the portal in conjunction with activities in WP1 and will include technical management needs such as bug tracking.

ZDMP has acquired the following domains:

- www.ZDMP.eu (main/default)
- www.zerodefects.eu
